## READ PRIOR TO YOUR BIOSLIMMING WRAP SALON VISIT:

Thank you, for choosing BIOSLIMMING. The revolutionary way to slim & firm your body!

To get the most out of your Active Wrap it is advisable not to shower for at least 2 hours as the products continue to work. Note: You will continue to burn calories for 2 hours following your Active Wrap.

Drink a pint of water following the Active Wrap to help flush out toxins which have been released during the wrap. You can assist the body's detoxifying process even more by drinking 1-1.5 liters of water daily.

It is advisable to use the Bioslimming Home Care Program to continue your inch loss and cellulite reduction. You can purchase these items in salon. The more you want to slim, the more often you apply the products, so at home use is highly recommended. But don't forget to book your next salon visit as every salon visit is equivalent to one full week of at home use!

Depending on the results you want to achieve, it is safe to have several salon appointments even weekly, in conjunction with products for at home use. For maximum results, it is recommended at the beginning to have 6-10 salon treatments within 4-6 weeks along with products for at home use. You will use judgment of personal preference to decide how often to book for continued maintenance.

We recommend you follow a healthy eating plan and exercise regime for optimum results. The home use products can be applied before workout to accentuate the slimming effect. Ask your Therapist for more information. Remember that if you become Pregnant you must discontinue use of the Homecare Program and cancel any salon appointments. Also if you have an appointment booked during the time of \*menstruation you may consider rescheduling your appointment.

\*Product contains ingredients that are stimulating to the system which cause hot and cold sensations that vary between individuals.

### What Are The Contraindications To Bioslimming?

Due to a high concentration of essential oils Bioslimming is unsuitable when you are pregnant or breast feeding.

### Has Bioslimming Body Wrap Been Clinically Tested And Safe?

Our products have been clinically tested and all the ingredients have been thoroughly reviewed and tested by toxicology center, physicians and pharmacists.

Please note that skin tolerance has not been evaluated when Bioslimming is used in conjunction with other machines or heated blankets. We advise professionals to proceed with common sense when combining Bioslimming with machines such as sauna or heated blanket or other products.

In very rare cases some people may experience skin irritation, allergic reactions, or cross-sensitivity to essential oils. If you are someone who is taking a lot of prescription medication and/or has a lot of allergies, you should do a patch test to check for skin irritation and sensitivity before using Bioslimming.

We recommend not to apply any perfume or any additional body cream, gel or fragrances on top of Bioslimming products. Showering before applying any other products is highly recommended.

Bioslimming Active Gel and Bioslimming Active Slim Cream both have a heating effect which can result in an intense reddening of the skin. This can appear more intense in some people than in others.

In cases of people with sensitive skin we recommend that you shower within 2 to 4 hours following a Bioslimming application or Bioslimming wrap.

## BIOSLIMMING HOMECARE PROGRAM INFO AND ADVICE

When using the Homecare Program you must use Active Slim Gel/ActiveSlimCream with Ultra Slim Effect.

A good time to apply products is prior to a work out or in the evening. Sensitive skin will need to shower 4 hours following the application. Apply and massage products in well with disposable gloves, and allow to dry. Wash hands after use, avoid contact with eyes and for general safety, keep out of reach of children.

Redness is normal and decreases after 20 mins. If redness persists after a few days discontinue use and consult your General Practitioner.

We recommend that you drink 1-1.5 litres of water daily to aid your body in flushing out toxins released during the treatment.

It is advisable to follow a healthy eating plan and exercise regimen to get optimum results.

Can be applied before a workout, to accentuate the slimming effect.

Do not use if you are breastfeeding and discontinue use if you become pregnant.
